### AVIOCREP

### Natural rubber based solvent adhesive

## CHARACTERISTICS

Natural rubber based adhesive	METHOD	QUALITY CHARACTERISTICS (U.M.)
Appearance and Color	Visual	Pale opalescent color
Viscosity	IO 07/42.10	3.000 – 3.500 cps
Time open	IO 07/42.6	At room temperature about 1 hour
Specific weight	IO 07/42.3	0,650 – 0,700 g/cc
Dry content	IO 07/42.4	11 – 13%

## USES

**Aviocrep** is a natural rubber-based adhesive particularly suitable for seams; thanks to the rapid drying, good tackiness and non-aggressiveness towards the finishes of both synthetic and natural materials. It is indicated in the construction of uppers and in small leather goods.

## INSTRUCTIONS FOR USE

Apply by brush or spreading machine on one or both surfaces to be glued, couple immediately and exert a slight pressure.

## STORAGE

The product should be stored in the original packaging at room temperature (5-35°C). In these conditions it remains suitable for about 12 months.

Particularly low storage temperatures lead to a considerable reversible thickening of the product and, consequently, a more difficult distribution. Shake well before use.

## PACKAGING

Metallic Containers Kg. net 4 - 13

## NOTES

**Aviocrep** is highly flammable: make sure that the systems used for handling are correctly grounded to prevent the accumulation of electrostatic charges.
